## Philosophy of Fota Island Spa

The concept behind Fota Island Spa is one of well-being, offering a unique combination that caters for both the restoration of personal energy and vitality or holistic relaxation and pampering. Fota Island Spa lies deep within one of the most dramatic and outstanding natural settings on the Irish coast.

Breathe in the pure air, let your eyes linger over the stunning views of the Resort's mature woodlands, and surrender yourself to the luxurious natural serenity of Fota Island Spa; this is the magic that awaits you in one of Europe's finest spas.

For many, the ultimate luxury and way to rejuvenate the body and mind, is to indulge in a soothing spa treatment. In a job which is dedicated to caring for others, you are safe in the hands of our dedicated and talented male and female spa therapists. Relax as you slowly fall into a state of calm as you enjoy your treatment.

Fota Island Spa takes its commitment to sustainable practices seriously by taking the below measures:

At Fota Island Spa, all of our professional product containers are recycled or reused. At the spa we no longer using single use plastic sups, we encourage visitors to the spa to bring their own reusable bottles. We refill all of our glass bottles with the water from a filter system.

At Fota Island Spa we use low energy light bulbs and recycle all of our paper. We operate an environmentally conscious laundry facility in house, cutting down on transportation emissions. Waste bins are divided into food, recycle and general waste.

We are committed to reducing our environmental impact and continually improving our environmental performance. This is an integral part of our business strategy and operating methods. We hope to inspire our customers, clients, suppliers and other stakeholders to follow this example.
